corrosion Skin Corr. 1A

Eye Dam. 1

H314 Causes severe skin burns and eye damage. H318 Causes serious eye damage.

environment

H400 Very toxic to aquatic life. Aquatic Acute 1 Aquatic Chronic 1 H410 Very toxic to aquatic life with long lasting effects.

STOT SE 3

H335 May cause respiratory irritation.

· 2.2 Label elements

· Labelling according to Regulation (EC) No 1272/2008

The product is classified and labelled according to the GB CLP regulation. · Hazard pictograms

· Signal word Danger

· Hazard-determining components of labelling: potassium dicyanoargentate potassium carbonate

· Hazard statements

H314 Causes severe skin burns and eye damage. H335 May cause respiratory irritation.

H410 Very to	exic to aquatic life with long lasting effects.
Precautiona	ry statements
P273	Avoid release to the environment.
P303+P361	+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].
P305+P351	+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, i present and easy to do. Continue rinsing.
P310	Immediately call a POISON CENTER/doctor.
P321	Specific treatment (see on this label).
P405	Store locked up.
P501	Dispose of contents/container in accordance with local/regional/national/internationa regulations.
Additional ir	8
	ntact with acids liberates very toxic gas.
	tains: Reportable explosives precursors. Making available, introduction, possession and us Regulation (EU) 2019/1148, Article 9.

Results of Place	BT and vPvB assessment
PBT: Not ap	plicable.
vPvB: Not ap	pplicable.

SECTION 3: Composition/information on ingredients

· 3.2 Mixtures

• Description: Mixture of substances listed below with nonhazardous additions.

· Dangerous components / Information on ingredients:		
	potassium dicyanoargentate Met. Corr. I, H290; Skin Corr. 1A, H314; Eye Dam. 1, H318 Aquatic Acute 1, H400; Aquatic Chronic 1, H410	25–50%
CAS: 584-08-7 EINECS: 209-529-3 RTECS: TS 7750000	EUH032, EUH071 potassium carbonate Skin Irrit. 2, H315; Eye Irrit. 2, H319; STOT SE 3, H335	25-50%
	vording of the listed hazard phrases refer to section 16	

Additional information: For the wording of the listed hazard phrases refer to section 16.

SECTION 4: First aid measures

• 4.1 Description of first aid measures

• General information:

Immediately remove any clothing soiled by the product.

- Remove breathing equipment only after contaminated clothing have been completely removed.
- In case of irregular breathing or respiratory arrest provide artificial respiration.
- Personal protection for the First Aider.

Take affected persons out of danger area and lay down.

Involve doctor immediately after a accident or unwell

- · After inhalation:
- Supply fresh air or oxygen; call for doctor.

In case of unconsciousness place patient stably in side position for transportation.

• After skin contact:

Immediately wash with water and soap and rinse thoroughly.

Immediately rinse with water.

If skin irritation continues, consult a doctor.

• After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor.

(Contd. on page 4) GB

Version number 4 (replaces version 3)

Revision: 03.08.2023

Trade name: Silver salt SCANDIA 360 without KCN Silbersalz Scandia 360 ohne KCN

(Contd. of page 3)

• After swallowing:

Printing date: 03.08.2023

Do not induce vomiting; call for medical help immediately.

Drink plenty of water and provide fresh air. Call for a doctor immediately. A person vomiting while laying on their back should be turned onto their side. Rinse out mouth and then drink plenty of water.

· Information for doctor: Cyanides poisoning

• 4.2 Most important symptoms and effects, both acute and delayed Cyanosis

· Hazards Danger of gastric perforation.

4.3 Indication of any immediate medical attention and special treatment needed

No further relevant information available.

SECTION 5: Firefighting measures

• 5.1 Extinguishing media

· Suitable extinguishing agents:

CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

- For safety reasons unsuitable extinguishing agents: Water with full jet
- 5.2 Special hazards arising from the substance or mixture
- Formation of toxic gases is possible during heating or in case of fire. Hydrogen cyanide (HCN)
- 5.3 Advice for firefighters
- Protective equipment:

Wear self-contained respiratory protective device.

SECTION 6: Accidental release measures

• 6.1 Personal precautions, protective equipment and emergency procedures Mount respiratory protective device with combination filter B / P3 Avoid formation of dust.	
Mount respiratory protective device.	
Wear protective equipment. Keep unprotected persons away.	
Use respiratory protective device against the effects of fumes/dust/aerosol.	
Only handle and refill product in closed systems.	
· 6.2 Environmental precautions:	
Do not allow product to reach sewage system or any water course.	
Inform respective authorities in case of seepage into water course or sewage system.	
Do not allow to enter sewers/ surface or ground water.	
\cdot 6.3 Methods and material for containment and cleaning up:	
Send for recovery or disposal in suitable receptacles.	
Dispose contaminated material as waste according to section 13.	
Ensure adequate ventilation.	
· 6.4 Reference to other sections	
See Section 7 for information on safe handling.	
See Section 8 for information on personal protection equipment.	
See Section 13 for disposal information.	
	CD

SECTION 7: Handling and storage · 7.1 Precautions for safe handling Thorough dedusting. Keep receptacles tightly sealed. Ensure good ventilation/exhaustion at the workplace. he usual precautionary measures are to be adhered to when handling chemicals. Wear suitable respiratory protective device when decanting larger quantities without extractor facilities. Do not dry clean dust covered objects and floors. Wash thoroughly with plenty of water. · Information about fire - and explosion protection: Keep respiratory protective device available. · 7.2 Conditions for safe storage, including any incompatibilities · Storage: • Requirements to be met by storerooms and receptacles: Provide alkali-resistant floor. Store only in unopened original receptacles. Observe official regulations on storing packagings. Observe official regulations on storing packagings. Prevent any seepage into the ground. · Information about storage in one common storage facility: Do not store together with acids. Store away from foodstuffs. · Further information about storage conditions: Keep container tightly sealed. Store under lock and key and out of the reach of children. · Storage class: 8 B · 7.3 Specific end use(s) No further relevant information available. **SECTION 8: Exposure controls/personal protection** · 8.1 Control parameters · Ingredients with limit values that require monitoring at the workplace: CAS: 506-61-6 potassium dicyanoargentate AGW (Germany) Long-term value: 0.01E mg/m³ 2(1);DFG,EU,10 • **Regulatory information** AGW (Germany): TRGS 900 • Additional information: The lists valid during the making were used as basis. · 8.2 Exposure controls • Appropriate engineering controls No further data; see section 7. · Individual protection measures, such as personal protective equipment • General protective and hygienic measures: The usual precautionary measures are to be adhered to when handling chemicals. Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing Wash hands before breaks and at the end of work. Store protective clothing separately. Do not inhale gases / fumes / aerosols. Avoid contact with the eyes. Avoid contact with the eyes and skin.

According to EC Directive 89/686/EEC

· Respiratory protection:

Short term filter device:

(Contd. on page 6)

GB

Printing date: 03.08.2023

Version number 4 (replaces version 3)

Revision: 03.08.2023

Trade name: Silver salt SCANDIA 360 without KCN Silbersalz Scandia 360 ohne KCN

Combinationfilter ABEK-P3

(Contd. of page 5)

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

Beware: Filter masks provide protection for a short period of time only. They should only be used in exceptional cases, that is if a small amount of the substance has spilled out or in order to fight spillages and fire.

according EN 14387 according to EN 143 Hand protection

• Hand protection

Protective gloves

according to EN 374

To avoid skin problems reduce the wearing of gloves to the required minimum. Only use chemical-protective gloves with CE-labelling of category III. Sensibilisation by the components in the glove materials is possible.

Check the permeability prior to each anewed use of the glove.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Prior to working with gloves the rubbing in with tanniferous skin-protecting agents for the avoidance of skin softening due to perspiration is recommended.

Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

The determined penetration times according to EN 16523-1:2015 are not performed under practical conditions. Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.

For the mixture of chemicals mentioned below the penetration time has to be at least 480 minutes (Permeation according to EN 374 Part 3: Level 3).

Value for the permeation: Level ≤ 3

• Not suitable are gloves made of the following materials: Leather gloves Strong material gloves

· Eye/face protection

Tightly sealed goggles

according to EN 166 • **Body protection:** Protective work clothing

SECTION 10: Stability and reactivity

- · 10.1 Reactivity No further relevant information available.
- · 10.2 Chemical stability
- Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.
- · 10.3 Possibility of hazardous reactions

Contact with acids releases very toxic gases

- Reacts with acids, alkalis and oxidising agents.
- \cdot 10.4 Conditions to avoid No further relevant information available.
- · 10.5 Incompatible materials: Acids
- · 10.6 Hazardous decomposition products: Hydrogen cyanide (prussic acid)

SECTION 11: Toxicological information

- 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008
- Acute toxicity Based on available data, the classification criteria are not met.

· LD/LC50 values relevant for classification:

CAS: 506-61-6 potassium dicyanoargentate

Dermal LD50 mg/kg (Rat)

· Skin corrosion/irritation Causes severe skin burns and eye damage.

- · Serious eye damage/irritation Causes serious eye damage.
- · STOT-single exposure May cause respiratory irritation.
- 11.2 Information on other hazards
- Endocrine disrupting properties

None of the ingredients is listed.

SECTION 12: Ecological information

- · 12.1 Toxicity
- Aquatic toxicity: No further relevant information available.
- 12.2 Persistence and degradability No further relevant information available.
- 12.3 Bioaccumulative potential No further relevant information available.
- 12.4 Mobility in soil No further relevant information available.
- · 12.5 Results of PBT and vPvB assessment Not applicable.
- *PBT:* Not applicable.
- · vPvB: Not applicable.
- · 12.6 Endocrine disrupting properties

The product does not contain substances with endocrine disrupting properties.

· 12.7 Other adverse effects

- Remark: Very toxic for fish
- Additional ecological information:

· General notes:

Water hazard class 3 (German Regulation) (Self-assessment): extremely hazardous for water

Do not allow product to reach ground water, water course or sewage system, even in small quantities.

(Contd. on page 9)

Page 9/12

Version number 4 (replaces version 3)

s version 3) Revision: 03.08.2023

Trade name: Silver salt SCANDIA 360 without KCN Silbersalz Scandia 360 ohne KCN

(Contd. of page 8)

Danger to drinking water if even extremely small quantities leak into the ground. Also poisonous for fish and plankton in water bodies. Very toxic for aquatic organisms

SECTION 13: Disposal considerations

• 13.1 Waste treatment methods

· Recommendation

Printing date: 03.08.2023

Must not be disposed together with household garbage. Do not allow product to reach sewage system.

Contact manufacturer for recycling information.

· Waste disposal key:

The allocation of waste identity numbers/waste descriptions must be carried out according to the EEC, specific to the industry and process.

· Uncleaned packaging:

· Recommendation:

Disposal must be made according to official regulations.

Packaging which is uncleaned or soiled with product remains is to be treated like the product itself Packaging free of product remains is to be supplied refuse for recycling. Only if no adequate collecting system is available, they may be disposed of through the domestic rubbish

• *Recommended cleansing agents:* Water, if necessary together with cleansing agents.
